

RIGGING LOFT CONTROLLER & EXAMINER TRAINING

Course Description:

This course is designed to provide participants with a better knowledge and understanding of the legal and practical requirements in running an operational rigging loft, from controlling the issue and receiving of rigging loft equipment to carrying out pre-use inspections and the disposal and quarantine of unfit for use equipment.

Target Audience:

Rigging loft controllers, their assistants and any other personnel involved with the day to day running and operation of a rigging loft.

Course Duration: 3 days

At the end of the course, participants will be;

- Familiar with the various lifting equipment usually found in a Rigging Loft, the way the equipment must be stored and issued (Tee card system).
- Able to know the Inspections that must be carried out before the equipment is used, and how the equipment must be inspected and returned to the Rigging Loft after use.
- Know various examples of equipment damaged through incorrect usage.
- Able to inspect wire rope and webbing slings.

Certification: At the end of the course successful participants will receive a **LEEA accredited certificate**.
